

Reverse osmosis with water softener and EDI

Pharma industry

APPLICATION:

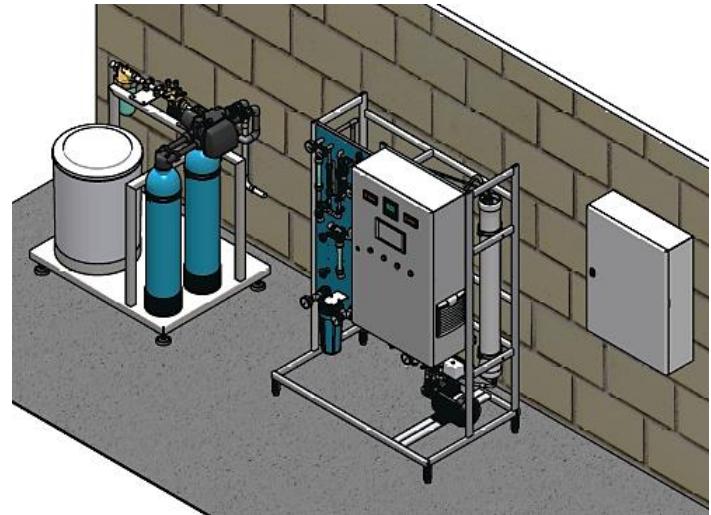

- Production of natural cosmetic
- Preparation of ultrapure water – full desalination of softened drinking water by reverse osmosis and electrodeionisation

PROCEDURE:

- Softfilter 5 µm filter cartridge, backwashable
- Double softening system to 0°dH
- Reverse osmosis
- Elektrodeionisation to continuous diluat quality with conductivity < 1 µS/cm
- UV- treatment for disinfection
- Fully automatic control

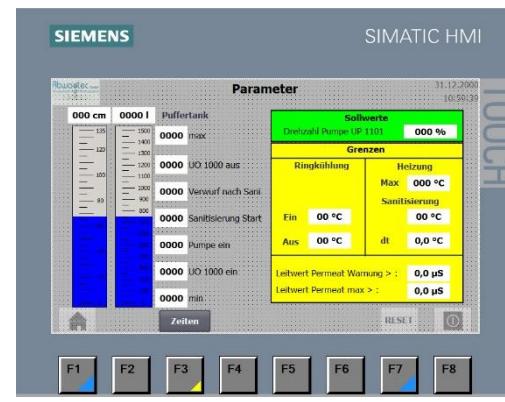

REALISATION: 2020

LOCATION: Germany

Schema reverse osmosis with EDI

Parameter/Technical data	
Temperature	5 – 35 °C
pH	5 – 9,5
Permeat performance RO	200 l/h
Conductivity diluat EDI	< 1 µS/cm
Working pressure	max 12 bar
Installed power	1,5 kW
